The offer shall be made in writing and shall include (a) the reason for the offer of voluntary surrender or limitation, (b) whether the offer is for a permanent, indefinite, or definite period of time, and (c) any terms and conditions that the credential holder wishes to have the department consider and apply to the voluntary surrender or limitation of the credential.

(2) The department may accept an offer of voluntary surrender or limitation of a credential (a) based on an offer made by the credential holder on his or her own volition, (b) based on an offer made with the agreement of the Attorney General for cases brought under section 38-1,107 or the legal counsel of the department for cases brought under sections 38-1,119 to 38-1,123 to resolve a pending disciplinary matter, (c) in lieu of filing a petition for disciplinary action, or (d) in response to a notice of disciplinary action.

(3) The department may reject an offer of voluntary surrender of a credential under circumstances which include, but are not limited to, when such credential (a) is under investigation, (b) has a disciplinary action pending but a disposition has not been rendered, or (c) has had a disciplinary action taken against it.

(4) In all instances, the decision shall be issued in the form of a written order by the director. The order shall be issued within thirty days after receipt of the offer of voluntary surrender or limitation and shall specify (a) whether the department accepts or rejects the offer of voluntary surrender and (b)(i) the terms and conditions under which the voluntary surrender is accepted or (ii) the basis for a rejection of an offer of voluntary surrender. 38-1,110. Complaint alleging dependence or disability; director; investigation; report; review by board; finding; effect. (1) When the department has received a complaint or report by any person or any report has been made to the director by the Licensee Assistance Program under section 38-175 alleging that an applicant for a credential or a person credentialed

to practice any profession is suffering from abuse of, dependence on, or active addiction to alcohol, any controlled substance, or any mind-altering substance that impairs the ability to practice the profession or illness, deterioration, or disability that impairs the ability to practice the profession, the director shall investigate such complaint to determine if any reasonable cause exists to question the qualification of the applicant or credential holder to practice or to continue to practice such profession.

(2) If the director on the basis of such investigation or, in the absence of such complaint, upon the basis of his or her own independent knowledge finds that reasonable cause exists to question the qualification of the applicant or credential holder to practice such profession because of abuse of, dependence on, or active addiction to alcohol, any controlled substance, or any mind-altering substance that impairs the ability to practice the profession or illness, deterioration, or disability that impairs the ability to practice the profession, the director shall report such finding and evidence supporting it to the appropriate board.

(3) If such board agrees that reasonable cause exists to question the qualification of such applicant or credential holder, the board shall appoint a committee of three qualified physicians or other qualified professionals to examine the applicant or credential holder and to report their findings and conclusions to the board. The cost of the examination shall be treated as a base cost of credentialing under section 38-152. The board shall then consider the findings and the conclusions of the physicians or other qualified professionals and any other evidence or material which may be submitted to that board by the applicant or credential holder, by the director, or by any other person and shall then determine if the applicant or credential holder is qualified to practice or to continue to practice such profession in the State of Nebraska.

(4) If such board finds the applicant or credential holder to be not qualified to practice or to continue to practice such profession because of abuse of, dependence on, or active addiction to alcohol, any controlled substance, or any mind-altering substance that impairs the ability to practice the profession or illness, deterioration, or disability that impairs the ability to practice the profession, the board shall so certify that fact to the director with a recommendation for the denial, refusal of renewal, limitation, suspension, or revocation of such credential. The director shall thereupon deny, refuse renewal of, suspend, or revoke the credential or limit the ability of the credential holder to practice such profession in the state in such manner and to such extent as the director determines to be necessary for the protection of the public.

The cost of the examination or evaluation shall be paid by the applicant or credential holder.

(2) Upon such finding the director, notwithstanding the provision of any other statute, shall issue, return, or reinstate such credential or remove any limitation on such credential if the applicant or credential holder is otherwise qualified as determined by the appropriate board to practice or to continue in the practice of the profession.

71-6221. Regulation of health profession; change in scope of practice; when. (1) After January 1, 1985, a health profession shall be regulated by the state only when:

(a) Unregulated practice can clearly harm or endanger the health, safety, or welfare of the public and the potential for the harm is easily recognizable and not remote or dependent upon tenuous argument;

(b) Regulation of the profession does not impose significant new economic hardship on the public, significantly diminish the supply of qualified practitioners, or otherwise create barriers to service that are not consistent with the public welfare and interest;

(c) The public needs, and can reasonably be expected to benefit from, assurance of initial and continuing professional ability by the state; and

(d) The public cannot be effectively protected by other means in a more cost-effective manner.

(2) If it is determined that practitioners of a health profession not currently regulated are prohibited from the full practice of their profession in Nebraska, then the following criteria shall be used to determine whether regulation is necessary:

(a) Absence of a separate regulated profession creates a situation of harm or danger to the health, safety, or welfare of the public and the potential for the harm is easily recognizable and not remote or dependent upon tenuous argument;

(b) Creation of a separate regulated profession would not create a significant new danger to the health, safety, or welfare of the public;

(c) Creation of a separate regulated profession would benefit the health, safety, or welfare of the public; and

(d) The public cannot be effectively protected by other means in a more cost-effective manner.

(3) After March 18, 1988, the scope of practice of a regulated health profession shall be changed only when:

(a) The present scope of practice or limitations on the scope of practice create a situation of harm or danger to the health, safety, or welfare of the public and the potential for the harm is easily recognizable and not remote or dependent upon tenuous argument;

(b) The proposed change in scope of practice does not create a significant new danger to the health, safety, or welfare of the public;

(c) Enactment of the proposed change in scope of practice would benefit the health, safety, or welfare of the public; and

(d) The public cannot be effectively protected by other means in a more cost-effective manner.

(4) The Division of Public Health shall, by rule and regulation, establish standards for the application of each criterion which shall be used by the review bodies in recommending whether proposals for credentialing or change in scope of practice meet the criteria.

71-6222. Least restrictive method of regulation; how implemented. After evaluating the criteria in sections 71-6221 to 71-6223 and considering governmental and societal costs and benefits, if the Legislature finds that it is necessary to regulate a health profession not previously regulated by law, the least restrictive alternative method of regulation shall be implemented, consistent with the public interest and this section, as follows:

(1) When the threat to the public health, safety, welfare, or economic well-being is relatively small, regulation shall be by means other than direct credentialing of the health profession. Such regulation may include, but shall not be limited to:

- (a) Inspection requirements;
- (b) Enabling an appropriate state agency to bring an end to a harmful practice by injunctive relief in court;
- (c) Regulating the business activity or entity providing the service rather than the employees of the business or entity; or
- (d) Regulating or modifying the regulation of the health profession supervising or responsible for the service being performed;

(2) When there exists a diversity of approaches, methods, and theories by which services may be rendered and when the right of the consumer to choose freely among such options is considered to be of equal importance with the need to protect the public from harm, the regulation shall implement a system of registration;

(3) When the consumer may have a substantial basis for relying on the services of a practitioner, the regulation shall implement a system of certification; or

(4) When it is apparent that adequate regulation cannot be achieved by means other than licensing, the regulation shall implement a system of licensing.

71-6223. Letter of intent; application; contents. An applicant group shall submit a letter of intent to file an application to the director on forms prescribed by the director. The letter of intent shall identify the applicant group, the proposed regulation or change in scope of practice sought, and information sufficient for the director to determine whether the application is eligible for review. The director shall notify the applicant group as to whether it is eligible for review within fifteen days of the receipt of the letter of intent. The final application shall be submitted to the director who shall notify the applicant group of its acceptance for review within fifteen days of receipt of the final application. If more than one application is received in a given year, the director may establish the order in which applications shall be reviewed. The application shall include an explanation of:

(1) The problem and why regulation or change of the scope of practice of a health profession is necessary, including (a) the nature of the potential harm to the public if the health profession is not regulated or the scope of practice of a health profession is not changed and the extent to which there is a threat to public health and safety, (b) the extent to which consumers need, and will benefit from, a method of regulation identifying competent practitioners and indicating typical employers, if any, of practitioners in the health profession, and (c) the extent of autonomy a practitioner has, as indicated by the extent to which the health profession calls for independent judgment, the extent of skill or experience required in making the independent judgment, and the extent to which practitioners are supervised;

(2) The efforts made to address the problem, including (a) voluntary efforts, if any, by members of the health profession to establish a code of ethics or help resolve disputes between health practitioners and consumers and (b) recourse to, and the extent of use of, applicable law and whether present law could be strengthened to control the problem;

(3) If the application is for the regulation of an unregulated health profession, an analysis of all feasible methods of regulation, including those methods listed in section 71-6222, identifying why each method is or is not appropriate for regulation of the profession;

(4) The benefit to the public if the health profession is regulated or the scope of practice of a health profession is changed, including:

(a) The extent to which the incidence of specific problems present in the unregulated health profession can reasonably be expected to be reduced by regulation;

(b) Whether the public can identify qualified practitioners;

(c) The extent to which the public can be confident that qualified practitioners are competent, as determined by:

(i) Whether the proposed regulatory entity would be a board composed of members of the profession and public members or a state agency, or both, and, if appropriate, their respective responsibilities in administering the system of registration, certification, or licensure, including the composition of the board and the number of public members, if any; the powers and duties of the board or state agency regarding examination and revocation, suspension, and nonrenewal of registrations, certificates, or licenses; the adoption and promulgation of rules and canons of ethics; the conduct of inspections; the receipt of complaints and disciplinary action taken against practitioners; and how fees would be levied and collected to cover the

expenses of administering and operating the regulatory system;

(ii) If there is a grandfather clause, whether such practitioners will be required to meet the prerequisite qualifications established by the regulatory entity at a later date;

(iii) The nature of the standards proposed for registration, certification, or licensure as compared with the standards of other jurisdictions;

(iv) Whether the regulatory entity would be authorized to enter into reciprocity agreements with other jurisdictions; and

(v) The nature and duration of any training including, but not limited to, whether the training includes a substantial amount of supervised field experience; whether training programs exist in this state; if there will be an experience requirement; whether the experience must be acquired under a registered, certified, or licensed practitioner; whether there are alternative routes of entry or methods of meeting the prerequisite qualifications; whether all applicants will be required to pass an examination; and if an examination is required, by whom it will be developed and how the costs of development will be met; and

(d) Assurance of the public that practitioners have maintained their competence, including whether the registration, certification, or licensure will carry an expiration date and whether renewal will be based only upon payment of a fee or will involve reexamination, peer review, or other enforcement;

(5) The extent to which regulation or the change of scope of practice might harm the public, including:

(a) The extent to which regulation will restrict entry into the health profession as determined by (i) whether the proposed standards are more restrictive than necessary to ensure safe and effective performance and (ii) whether the proposed legislation requires registered, certificated, or licensed practitioners in other jurisdictions who migrate to this state to qualify in the same manner as state applicants for registration, certification, and licensure when the other jurisdiction has substantially equivalent requirements for registration, certification, or licensure as those in this state; and

(b) Whether there are similar professions to that of the applicant group which should be included in, or portions of the applicant group which should be excluded from, the proposed legislation;

(6) The maintenance of standards, including (a) whether effective quality assurance standards exist in the health profession, such as legal requirements associated with specific programs that define or enforce standards or a code of ethics, and (b) how the proposed legislation will assure quality as determined by the extent to which a code of ethics, if any, will be adopted and the grounds for suspension or revocation of registration, certification, or licensure;

(7) A description of the group proposed for regulation, including a list of associations, organizations, and other groups representing the practitioners in this state, an estimate of the number of practitioners in each group, and whether the groups represent different levels of practice; and

(8) The expected costs of regulation, including (a) the impact registration, certification, or licensure will have on the costs of the services to the public and (b) the cost to the state and to the general public of implementing the proposed legislation.

71-6223.01. Application fee; disposition; waiver. Each application shall be accompanied by an application fee of five hundred dollars to be submitted at the time the letter of intent is filed. All application fees shall be deposited in the Nebraska Regulation of Health Professions Fund. The application fee shall not be refundable, but the director may waive all or part of the fee if he or she finds it to be in the public interest to do so. Such a finding by the director may include, but shall not be limited to, circumstances in which the director determines that the application would be eligible for review and:

(1) The applicant group is an agency of state government;

(2) Members of the applicant group will not be materially affected by the implementation of the proposed regulation or change in scope of practice; or

(3) Payment of the application fee would impose unreasonable hardship on members of the applicant group.

Source: Laws 1988, LB 384, § 14.

71-6223.02. Directed review; initiation; procedure; report. At any time the director and the chairperson may initiate a directed review to determine the advisability of credentialing a health professional group not previously regulated, of changing the scope of practice of a regulated health profession, or of other issues regarding the regulation of health professions. Before initiating a directed review, the director and the chairperson shall determine that no appropriate applicant group exists. No letter of intent, applicant group, application, or application fee shall be required in a directed review. The duty of the committee in a directed review shall be to investigate the issues that are the subject of the review, to hold a public hearing to receive information from the public on the issues, to develop a specific proposal to address the issues investigated taking into account the appropriate criteria as set forth in section 71-6221, and to prepare a final report containing the committee's proposal, other options considered, and other relevant information.

Source: Laws 1993, LB 536, § 106.

71-6224. Technical committee; appointment; membership; meetings; duties. (1) The director with the advice of the board shall appoint an appropriate technical committee to examine and investigate each application. The committee shall

consist of six appointed members and one member of the board designated by the board who shall serve as chairperson of the committee. The chairperson of the committee shall not be a member of the applicant group, any health profession sought to be regulated by the application, or any health profession which is directly or indirectly affected by the application. The director shall ensure that the total composition of the committee is fair, impartial, and equitable. In no event shall more than two members of the same regulated health profession, the applicant group, or the health profession sought to be regulated by an application serve on a technical committee.

(2) As soon as possible after its appointment, the committee shall meet and review the application assigned to it. Each committee shall conduct public factfinding hearings and shall otherwise investigate the application. Each committee shall comply with the Open Meetings Act.

(3) Applicant groups shall have the burden of bringing forth evidence upon which the committee shall make its findings. Each committee shall detail its findings in a report and file the report with the board and the director. Each committee shall evaluate the application presented to it on the basis of the appropriate criteria as established in sections 71-6221 to 71-6223. If a committee finds that all appropriate criteria are not met, it shall recommend denial of the application. If it finds that all appropriate criteria are met by the application as submitted, it shall recommend approval. If the committee finds that the criteria would be met if amendments were made to the application, it may recommend such amendments to the applicant group and it may allow such amendments to be made before making its final recommendations. If the committee recommends approval of an application for regulation of a health profession not currently regulated, it shall also recommend the least restrictive method of regulation to be implemented consistent with the cost-effective protection of the public and with section 71-6222. The committee may recommend a specific method of regulation not listed in section 71-6222 if it finds that such method is the best alternative method of regulation. Whether it recommends approval or denial of an application, the committee may make additional recommendations regarding solutions to problems identified during the review.
